*Like Having A Nurse In The Family!*

Nursing Liaisons is a group of experienced Registered Nurses who provide personalized health services for individuals before and after medical procedures.

Our goal is to provide a relationship that gives emotional and medical support when family and friends cannot be available or are not able to handle a patients' medical needs.

We can provide transportation for medical appointments or procedures (like colonoscopies).

We can accompany you or your loved one to appointments and help to interpret the recommendations.

Our nurses can offer you ongoing support and help with medical issues such as the review of medications and coordination of care between all of your health care providers.

We transport care and deliver compassion to outpatients when they need it - just like having a nurse in the family!

*Communications were excellent and she got me home safely. It was a pleasure. Having a reliable and helpful person to assist takes so much stress out of the situation. - Carmen*

*I wished I had known about this service sooner. It worked out great. - Rodney*

*How can I thank you for my mother being able to come to my wedding and reception? I will never forget how Nursing Liaisons made this happen! - Jean*
